Social Determinants of Health (SDoH) Resources to Inform Your Practice

As of January 1, 2020, all CHN practices have begun screening for Social Determinants of Health. Here are some key learnings and considerations we have discovered during this process:

- In order to achieve compliance, claims **must include** one of the following two HCPCS codes:
 - G9920: Screening Performed and Negative
 - G9919: Screening Performed and Positive and Provision of Recommendations

Please note: One of the above **HCPCS codes is required** for compliance. The additional ICD-10 Z codes related to a particular need is **not required**, but it is recommended due to its effect on the patient's risk score.

- In order for a patient to be included in the denominator, they must have had **a sick visit at a PCP practice within 2020**.
- Each patient** must have an SDoH screening completed once in 2020, not just one screening per family during 2020.
- The SDoH screening **can occur at sick or well visits**.
- Closed-loop referrals **will not be required** by Blue KC until 2021.
