**Congratulations to all CHN practices! Your teamwork and collaboration made this possible!**

## Population Health Management Technology Platform Transition: Innovaccer Functionality Preview & Deployment Plan

Innovaccer is the population health management technology platform utilized by CHN as we transition from Evolent Vision. Innovaccer offers several solutions for different needs including InNote and Patient 360 (P360).

InNote allows point-of-care workflow integration, specifically helpful for pre-visit planning and for use at the point of care. InNote concisely and efficiently communicates a patient profile including gaps in care/recommended care, recent acute visits including inpatient admissions, ED visits, and Urgent Care visits, and past and future specialty visits. InNote automatically identifies patients and presents relevant and actionable information at the point of care. [Click here](#) to view the **InNote Quick Guide!**

Patient 360 (P360) is Innovaccer's comprehensive view of the patient's longitudinal record, combining both claims data and EMR data. [Click here](#) to view the **Patient 360 Quick Guide!**
