

Our Mission

The Mission of Children's Mercy Integrated Care Solutions (ICS) and Children's Mercy Health Network (CMHN) is to improve the health and well-being of children through integrated pediatric networks in the Kansas City area that are valued based, community focused, patient centric and accountable for the quality and cost of care.

Who We Are

Children's Mercy Health Network (CMHN) is a non-exclusive, clinically integrated network of pediatric providers that include independent community pediatric providers and providers who are employed or contracted with Children's Mercy Hospital in Kansas City and surrounding areas. CMHN's objective is to deliver high-value and integrated care that meets the Triple Aim for children in the target population by:

- Improving the patient experience of care that includes quality outcomes and patient satisfaction
- Improving the health of the target population
- Reducing the per capita cost of health care

CMHN believes valued-based payment contracts and clinical integration between community and health system providers are necessary to align incentives and create an integrated and coordinated management approach.

What We Do

CMHN will provide a unique offering to commercial payers that will align practice policies, improve the level of care and engage in valued based payment methodologies.

Physician leadership, provider participation and professional management are the keys to the success of this integrated network. CMHN will offer:

- Population management tools and information technology that can transform CMHN practices and ultimately align practice policies, improve care and impact the overall cost of care
- An integrated approach to care management and promotion of patient centered medical home practices
- Single signature contracting, streamlined credentialing and single point of contact for administrative simplification
